TASTING TOUR ACTIVITY

ACTIVITY OUTCOMES

In this lesson students will...

• be able to taste different produce items growing in the Learning Garden
• describe if they tried it, liked it, or loved different Learning Garden crops by completing the Tasting Tour worksheet

MATERIALS & PREPARATION

• Complete TKC’s Harvesting Activity (crops to be harvested and washed)
• Review TKC’s Tasting Etiquette Activity with your students, (if needed)
• Print Tasting Tour worksheet, 1 per student
• Create crop signs, if needed
• Clipboard or hard surface for writing for each student
• Pen or pencil for each student

TEACHER BACKGROUND

Tasting a variety of crops is a great way for students to increase their knowledge of different crops and, in turn, start to find fruits and vegetables that they like to eat! Nothing is quite like harvesting and tasting your very own snap pea or radish – students love the farm to table idea and are more likely to try new, different crops!

INTRODUCTION

Spend time introducing students to the crops they will be tasting today. For each crop, take a poll to see how many students have tried that crop prior to the Tasting Tour. If needed, create a sign for each crop to help the students identify the crop during the Tasting Tour.

ACTIVITY

1. Break students into small groups. The number of groups should reflect the number of crops that will be tasted. If you have 5 crops to taste, break the students into 5 groups.
2. In different areas of the Learning Garden, set out the freshly harvested and washed crops for the Tasting Tour. If possible, set the crop in front the area from where it was harvested.
3. Have students spend 3-5 minutes tasting the crop and recording their thoughts on the Tasting Tour worksheet.
4. Rotate through each of the crops. Make sure that every student has the opportunity to try each crop.
5. Once everyone has finished the tasting tour, bring students back together to discuss each of the crops.

CONCLUSION

Have students share key parts of the day’s activity and review the Activity Outcomes.

Reminders:

Your local school district may, or may not, have regulations about eating produce directly from your Learning Garden. Reach out to your regional Garden Educator to find out more information.

As the teacher, be aware of poisonous plants and other hazards in and around your Learning Garden. Review those concerns with your student. Review any additional Learning Garden rules with the students. Inquire about known bee/wasp sting allergies before going into the Learning Garden.
# Tasting Tour Activity

**Step One:** Taste your freshly harvested and washed crop.

**Step Two:** For each crop, mark an X if you tried it, liked the taste, or loved the taste.
