- **Planting peas**
- **Planting garlic**
- **Broadcast seeding**
- **Watering your garden with a spray nozzle**
- **Watering with your drip irrigation system**
- **Mulching your garden**
- **Harvesting garlic scapes**

---

At the end of your fall growing season, be sure you remove all diseased plant matter and plants with evidence of pests on them.

Plant the remaining available space in your garden with the pea seeds you have. Then cut down the remaining plants in your garden to the ground (do not disturb roots). Chop plants into small pieces and let them create a layer of mulch on the soil surface.

---

**Suggested Planting Date: Nov 1**

- **Peas (Overwintered)**
  - Seeding: Broadcast seed to 1-2” spacing
  - No Harvest

- **Garlic Cloves**
  - Spacing: 6 inches
  - Garlic Scape Harvest Window: May 15 - June 15
  - Garlic Bulb Harvest Window: June 15 - July 15
